201L LIQUID FILLED BOTTOM MOUNT

Our '200' series gauge line is a high quality line of liquid filled pressure gauges. The glycerine filling helps dampen the effects of pulsation and vibration, while also perpetually lubricating the movement and keeping contaminates such as dirt away from all moving parts, which will extend the life of the gauge.

This gauge has been specifically designed with original equipment manufacturers in mind and is typically used on hydraulic and pneumatic systems as well as any commercial or industrial application not corrosive to brass and bronze wetted parts where glycerine filling is suitable for use.
